

Community collaboration aimed at keeping you safe:

The Central Florida HOPE CENTER is proud to announce its' partnership with Premier Medical Associates (PMA) & Flo-MediLab Services (FML) to combat Covid-19 by providing Drive-through testing at our SODO and Clermont locations. The HOPE CENTER is already known for its community support ministries with its food pantry, job placement, and counseling and now able to offer our beloved communities the latest advanced Covid-19 testing available today.

This new testing technology is brought to you by PMA and FML, both known for being a pioneer and pro-active forerunner in the fight against COVID-19. PMA will schedule a Telehealth visit and order the testing if necessary and schedule a time for you to show up at the drive-thru location and get tested by clinical professionals. FML will then test your sample rapidly.

The process involves using advanced robotics that have adopted *MultiPlex* technology which look at Six Gene Targets instead of the traditional *MonoPlex* which only looks at One to Two Gene Targets increasing test accuracy. This will allow a Rapid result of a True Positive and True Negative which will greatly reduce false positives or negatives; and in-turn, saving you time and stress associated with their less advanced testing. Test results are running 24-72 hours from the time the result reaches the FML laboratory. Testing is covered by all insurance plans and un-insured at 100% of the total amount without any patient responsibility (no copay or deductibles apply).

To schedule an appointment for your drive thru testing, email us at one of the two following locations:
